All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior permission of the copyright owner.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, SALEM, MA 01970 (U.S.A.). If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1980 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Contents

Volume 121 (1983)

Mutagenicity of 5-azacytidine in *Salmonella typhimurium* (MRLett 0399)
by D.M. Podger (Sydney) 1–6

Phagocytosis-induced mutagenesis in bacteria (MRLett 0401)
by M. Barak, S. Ulitzur and D. Merzbach (Haifa) 7–16

The basis of the insensitivity of *Salmonella typhimurium* strain TA98/1,8-DNP_6 to the mutagenic action of nitroarenes (MRLett 0402)
by Elena C. McCoy, Monika Anders and Herbert S. Rosenkranz (Cleveland) 17–23

A simple modification of the Salmonella liquid-incubation assay
Increased sensitivity for detecting mutagens in human urine (MRLett 0405)
by Norman Y. Kado, Donna Langley and Eric Eisenstadt (Sacramento, Davis and Boston) 25–32

Salmonella/microsome multiple indicator mutagenicity test (MRLett 0407)
by Antony J. Vithayathil, Cheryl McClure and John W. Myers (Portland) 33–37

Induction of chromosomal alterations as an assay for cytostatic drug activity in plasma (MRLett 0391)
by A.T. Natarajan, E.A. de Bruijn, P. Leeflang, P.H.Th.J. Slee, G.R. Mohn and O. Driessen (Leiden) 39–45

Induction of chromosome decondensation, sister-chromatid exchanges and endoreplications by 5-azacytidine, an inhibitor of DNA methylation (MRLett 0398)
by Tada-Aki Hori (Chiba) 47–52

The micronucleus test with mouse spleen cells (MRLett 0400)
by Yasuhiro Shindo, Fumiya Hirano, Hiroko Maeda and Ueto Takeda (Yokohama) .. 53–57

X-Ray-induced germ-line mutation leading to tumors
Its manifestation in mice given urethane post-natally (MRLett 0406)
by Taisei Nomura (Osaka) 59–65

Oxygen tension and sister-chromatid exchanges (MRLett 0409)
by Betsy Hirsch and Jaroslav Cervenka (Minneapolis) 67–69

Two methods to induce 6-thioguanine resistance in human fibroblasts in the presence of rat-liver microsomes (MRLett 0404)
by Shiu L. Huang and Michael D. Waters (Research Triangle Park) 71–76

Inability of several mutagen-blocking agents to inhibit 1,2-dimethylhydrazine-induced DNA-damaging activity in colonic epithelium (MRLett 0408)
by Michael J. Wargovich and Harold L. Newmark (Toronto) 77–80

Presence of 3-amino-β-carbolines (3-amino-9*H*-pyrido[3,4-*b*]indoles), effectors in the induction of sister-chromatid exchanges, in protein pyrolysates (MRLett 0414)
by Masao Tada, Hisaaki Saeki and Atsushi Oikawa (Sendai) 81–88

Structure–function characterization of phenanthridinium compounds as mutagens in Salmonella (MRLett 0415)
by Masahito Fukunaga and Lerena W. Yielding (Kitakyushu and Mobile) 89–94

Mutagenesis in Salmonella after metabolic activation of carcinogenic azo dyes and their isomers by liver S9 from rats, mice and hamsters (MRLett 0416)
by Yukio Mori, Toshiro Niwa, Kazumi Toyoshi, Kazuyuki Hirano and Mamoru Sugiura (Gifu) 95–102

0165-7992/83/$03.00 © 1983 Elsevier Science Publishers B.V.

Preliminary characterization of the mutagenic properties of 'necatorin', a strongly mutagenic compound of the mushroom *Lactarius necator* (MRLett 0419)
by Atte von Wright and Tapani Suortti (Espoo) 103–106

Demonstration of a powerful mutagenic dinitropyrene in airborne particulate matter (MRLett 0420)
by Hiroshi Tokiwa, Shigeji Kitamori, Reiko Nakagawa, Kazumi Horikawa and Luis Matamala (Fukuoka and Santiago) 107–116

Cytochrome P-450 factors determining synthesis in strain D7 *Saccharomyces cerevisiae* An alternative system to microsomal assay (MRLett 0412)
by Renata Del Carratore, Giorgio Bronzetti, Carlo Bauer, Claudio Corsi, Riccardo Nieri, Moreno Paolini and Pasquale Giagoni (Pisa) 117–123

Preliminary study on chromosomal aberrations in eggs of mice fertilized in vitro after X-irradiation (MRLett 0410)
by Yoichi Matsuda, Takeshi Yamada, Izuo Tobari and Akiko Ohkawa (Chiba) 125–130

A micronucleus method for detection of meiotic micronuclei in male germ cells of mammals (MRLett 0411)
by A.D. Tates, A.J.J. Dietrich, N. de Vogel, I. Neuteboom and A. Bos (Leiden and Amsterdam) 131–138

Double Y as an indicator in a test of mitotic non-disjunction in cultured human lymphocytes (MRLett 0413)
by M.L. Tenchini, A. Mottura, M. Velicogna, M. Pessina, G. Rainaldi and L. De Carli (Milan, Pisa and Pavia) 139–146

Enhancement by methylxanthines of sister-chromatid exchange frequency induced by cytostatics in normal and leukemic human lymphocytes (MRLett 0417)
by D. Mourelatos, J. Dozi-Vassiliades, V. Tsigalidou-Balla and A. Granitsas (Thessaloniki) 147–152

Inhibition of benzo[*a*]pyrene-induced mutagenesis in Chinese hamster V79 cells by hemin and related compounds (MRLett 0421)
by Yoichi Katoh, Nobuo Nemoto, Machiko Tanaka and Shozo Takayama (Tokyo) ... 153–157

Lack of enhanced mutation of UV- and γ-irradiated herpes virus in UV-irradiated CV-1 monkey cells (MRLett 0418)
by Koichi Takimoto (Kyoto) 159–166

Heat-induced mutagen formation from creatine and fat-soluble constituents of food (MRLett 0423)
by Antony J. Vithayathil, Michael Strasik and Lenka Strasik (Portland) 167–170

Further characterization of the expression of SOS functions in *recA430* mutants of *Escherichia coli* (MRLett 0427)
by Jorge Barbé, Ricardo Guerrero and Antonio Villaverde (Barcelona) 171–175

Absence of mutagenic activity of fodder proteins in the Ames Salmonella/microsome test (MRLett 0432)
by R. Pahlman and V. Raunio (Helsinki) 177–184

Identification of a mutagenic substance, in *Rubia tinctorum* L. (madder) root, as lucidin (MRLett 0436)
by Yohko Yasui and Nobuyuki Takeda (Kobe) 185–190

Mutagenicity testing of β-asarone and commercial calamus drugs with *Salmonella typhimurium* (MRLett 0440)
by Waltraud Göggelmann and Oskar Schimmer (Neuherberg and Erlangen) 191–194

A nuclear mutation decreasing *rho*$^-$ production modifies the unstable nitrous-acid sensitivity of yeast (MRLett 0425)
by N.A. Koltovaya and A.B. Devin (Dubna and Moscow) 195–198

Genotoxicity of acridine orange and acriflavine *Drosophila melanogaster* (MRLett 0441)
by P. Alba, M.D. Ferrés, N. Xamena, A. Creus and R. Marcos (Bellaterra) 199–203

SCEs induced by ionizing radiation are not the result of exchanges between homologous chromosomes (MRLett 0422)
by Robert B. Painter and William F. Morgan (San Francisco) 205–210
Induction of sister-chromatid exchanges (SCEs) and chromosomal aberrations by mitomycin C and methyl methanesulfonate in Chinese hamster ovary cells
An evaluation of methodology for detection of SCEs and of persistent DNA lesions towards the frequencies of observed SCEs (MRLett 0430)
by A.T. Natarajan, A.D. Tates, M. Meijers, I. Neuteboom and N. de Vogel (Leiden) . 211–223
Cytogenetic effects of an alkyl-lysophospholipid derivative in human peripheral lymphocytes exposed in vitro and in vivo (MRLett 0431)
by M. Bauchinger, J. Dresp, E. Schmid and W.E. Berdel (Neuherberg and München) . 225–231
Comparison of urethane-induced sister-chromatid exchanges in various murine strains, and the effect of enzyme inducers (MRLett 0435)
by Tommaso A. Dragani, Gabriella Sozzi and Giuseppe Della Porta (Milan) 233–239
Sister-chromatid exchange frequency in lymphocytes of smoking and nonsmoking mothers and their newborn infants (MRLett 0437)
by Max S. Lundberg and Gordon K. Livingston (Torrance and Salt Lake City) 241–246
SCE-inducing congeners in alcoholic beverages (MRLett 0438)
by H. Hoeft and G. Obe (Berlin) 247–251
No elevation of the frequencies of chromosomal alterations as a consequence of handling cytostatic drugs
Analyses with peripheral blood and urine of hospital personnel (MRLett 0439)
by A. Stiller, G. Obe, I. Boll and W. Pribilla (Berlin) 253–259
The relationship between sister-chromatid exchange induction and the formation of specific methylated DNA adducts in Chinese hamster ovary cells (MRLett 0442)
by S.M Morris, D.T. Beranek and R.H. Heflich (Jefferson) 261–266
Induction of presumed somatic gene mutations in mice by 2-naphthylamine (MRLett 0426)
by P.S. Chauhan, A. Neuhäuser-Klaus and U.H. Ehling (Neuherberg) 267–272
Dominant lethal test response with IMS and TEM using different combinations of male and female stocks of mice (MRLett 0429)
by J.B. Bishop, R.L. Kodell, E.B. Whorton and O.E. Domon (Jefferson and Galveston) 273–280
X-Ray-sensitive mutant mouse cells with various sensitivities to chemical mutagens (MRLett 0424)
by Koki Sato, Naoko Hieda-Shiomi and Hiroko Hama-Inaba (Chiba) 281–285
Suppression of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine-induced mutation in Chinese hamster V79 cells by inhibition of poly(ADP-ribose)polymerase activity (MRLett 0428)
by Nitaipada Bhattacharyya and Sukhendu B. Bhattacharjee (Calcutta) 287–292
Variation of superoxide dismutase levels in fetal calf serum (MRLett 0433)
by A. Baret and I. Emerit (Toulouse Naval and Paris) 293–297
Superoxide anion generated by potassium superoxide is cytotoxic and mutagenic to Chinese hamster ovary cells (MRLett 0434)
by Michael L. Cunningham and Belur R. Lokesh (Vienna) 299–304

Contents, Vol. 121 (1983) 305–307

Erratum 308

Mutation Research, 121 (1983) 308
Elsevier

Erratum

Von Wright, Atte, and Tapani Suortti (1983) Preliminary characterization of the mutagenic properties of 'necatorin', a strongly mutagenic compound of the mushroom *Lactarius necator* (MRLett 0419), Mutation Res., 121, 103–106.

Necatorin is erroneously identified as 5-hydroxycoumaro[7,8-*c*]cinnoline or its isomeric 5-hydroxycoumaro[6,7-*c*]cinnoline. The correct chemical name should be 7-hydroxycoumaro[5,6-*c*]cinnoline.

MUTATION RESEARCH

Publication schedule for 1983

MR is published according to a volume-numbering scheme that embraces all sections of the journal, in addition each section has its own code colour.

Reg (green), 'regular' volumes; DRR (brown), 'DNA Repair Reports', special section of Mutation Research; EMS (blue), Section on Environmental Mutagenesis and Related Subjects; Rev (purple), Reviews in Genetic Toxicology; GTT (red), Genetic Toxicology Testing; MRLett (yellow), Mutation Research Letters.

	Reg	DRR	EMS	Rev	GTT	MRLett
Jan.	107/1			114/1	116/1	119/1
Feb.	107/2	112/1	113/1		116/2	119/2
March	108/1,2,3			114/2	116/3+4	119/3+4
April	109/1	112/2	113/2	114/3	117/1+2	120/1
May	109/2		113/3+4	115/1		120/2+3
June		112/3		115/2	117/3+4	120/4
July	110/1				118/1+2	121/1
Aug.	110/2	112/4	113/5	115/3	118/3	121/2
Sep.	111/1			[b]123/1	118/4	121/3+4
Oct.	111/2	112/5	113/6	[b]123/2	[b]124/1	[b]122/1
Nov.	111/3				[b]124/2	[b]122/2
Dec.	INDEX[a]	112/6		[b]123/3	[b]124/3+4	[b]122/3+4
Total 15 Vols. [+ 3 Vols.] 107–121 [+ 122–124]	5 Vols. 107–111	1 Vol. 112	1 Vol. 113	2 Vols. [+ 1 Vol.] 114, 115 [+ 123]	3 Vols. [+ 1 Vol.] 116–118 [+ 124]	3 Vols. [+ 1 Vol.] 119–121 [+ 122]

The publication schedule of certain sections may be revised when necessitated by the inflow of manuscripts.

[a] Author Index and Subject Index for the year 1983 (covering all sections).

[b] For 1983 three additional volumes are scheduled: Vol. 122 for MRLett; Vol. 123 for Rev; Vol. 124 for GTT.

MUTATION RESEARCH

International journal on mutagenesis, chromosome breakage and related subjects

INSTRUCTIONS TO AUTHORS

Types of paper *Mutation Research* contains 3 types of publication. (1) Papers reporting results of original fundamental research concerning mutagenesis, chromosome breakage and related subjects. (2) Review articles. (3) Short communications (to be published in the Section *Mutation Research Letters*).

General arrangement of papers Papers should be preferably in English, but may also be submitted in French or German. A summary (about 300 words) is mandatory for all (normal-length) articles. Papers in German or French should have a summary in English. The first paragraph of the article should summarize the research problem and the pertinent findings. The main text may be divided into sections such as Material and methods, Experimental, Results, Discussion.

In papers mentioning chemicals, authors are requested to include *CAS registry numbers*. Registry numbers can be found by consulting Chemical Abstracts Ninth Collective Molecule Formula Index, by using Lockheed's computer access file named Chemline or by contacting the Chemical Abstracts Service, P.O. Box 3012, Columbus, Ohio 43210 (U.S.A.).

Preparation of text (a) Manuscripts should be typewritten, double-spaced with wide margins, on one side of the paper only. Legends, footnotes — everything — must also be double-spaced. (b) The full postal address(es) of the author(s), including postal code and country, should be given after their name(s). (c) Line-drawn figures (including graphs) should be submitted in black ink on white paper and must be lettered ready for direct reproduction. Sharp photoprints of lettered line drawings may also be submitted. It is important that the drawings themselves *AND* the lettering are in proportion and large enough to allow for reduction before printing. The amount of reduction that will be made can be judged from the sizes of figures in recent issues of the journal. (d) Half-tone figures should be submitted as very sharp and contrasty glossy photoprints, separate from line drawings. (e) Legends for both line-drawn and half-tone figures should be typed on separate sheets. (f) Tables (also to be typed double-spaced) should be provided with headings. (g) Typescripts should be carefully checked before submission to obviate alterations after acceptance.

References The journal uses the Harvard system, in which names and dates are given in the body of the text and an alphabetical list of references at the end of the manuscript. References in the text should give the author's surname with the year of publication, e.g.: Smith (1980); Smith and Jones (1976a, 1979b); Baker et al. (1978). In the list of references, titles of journals should be abbreviated to conform with *Chemical Abstracts Bibliographic Guide for Authors and Editors 1974*. References to books should give details of chapter title, editors, title of the book, publishers and their location.

Ehrenberg, L., and C.A. Wachtmeister (1977) Safety precautions in work with mutagenic and carcinogenic chemicals, in: B.J. Kilbey, M.S. Legator, W. Nichols and C. Ramel (Eds.), Handbook of Mutagenicity Test Procedures, Elsevier, Amsterdam, pp. 401–410.

Kastenbaum, M.A., and K.O. Bowman (1970) Tables for determining the statistical significance of mutation frequencies, Mutation Res., 9, 527–549.

MUTATION RESEARCH LETTERS

Manuscripts – in triplicate – may be submitted to:

Dr. R.J. Preston, Managing Editor, Mutation Research Letters, Oak Ridge National Laboratory, Biology Division, P.O. Box Y, OAK RIDGE, TN 37830 (U.S.A.)

or to one of the Members of the Editorial Board:

Dr. C.S. Aaron, Corporate Medical Affairs, Allied Chemical Corporation, P.O. Box 1021 R, MORRISTOWN, NJ 07960 (U.S.A.)

Dr. Angelo Abbondandolo, Consiglio Nazionale delle Richerche, Laboratorio di Mutagenesi e Differenziamento, Via Svezia 10, 56100 PISA (Italy)

Dr. Marija Alačević, Faculty of Technology, Laboratory of Industrial Microbiology, Pierottijeva 6/IV, 41000 ZAGREB (Yugoslavia)

James W. Allen, Ph.D., Research Biologist, Genetic Toxicology Division (MD-68), Health Effects Research Laboratory, U.S. Environmental Protection Agency, RESEARCH TRIANGLE PARK, NC 27711 (U.S.A.)

Dr. Bruce M. Cattanach, MRC Radiobiology Unit, HARWELL, Didcot, Oxon. OX11 ORD (England)

Professor D.R. Davies, John Innes Institute, Colney Lane, NORWICH NR4 7UH (England)

Dr. B.J. Dean, Shell Toxicology Laboratory (Tunstall), Sittingbourne Research Centre, SITTINGBOURNE, Kent ME9 8AG (England)

Dr. Lawrence Fishbein, National Center for Toxicological Research, JEFFERSON, AR 72079 (U.S.A.)

Dr. U. Graf, Institut für Toxikologie der Eidg. Technische Hochschule und der Universität Zürich, Schorenstrasse 16, SCHWERZENBACH/Zürich, CH-8603 (Switzerland)

Professor Dr. H. Greim, Institut für Toxikologie und Biochemie, Abt. für Toxikologie, Gesellschaft für Strahlen- und Umweltforschung, Ingolstädter Landstrasse 1, D-8042 NEUHERBERG, Post Oberschleissheim (West-Deutschland)

Dr. R.H. Haynes, Department of Biology, York University, TORONTO (Downsview), Ont. M3J 1P3 (Canada)

Professor Franklin Hutchinson, Department of Molecular Biophysics and Biochemistry, Yale University, Box 6666, 260 Whitney Avenue, NEW HAVEN, CN 06511 (U.S.A.)

Dr. S. Igali, National Research Institute for Radiobiology and Radiohygiene, "Frederic Joliot-Curie", P.O. Box 101, H-1775 BUDAPEST (Hungary)

Dr. B. Kilbey, Institute of Animal Genetics, West Mains Road, EDINBURG EH9 3JN (Scotland)

Dr. Mortimer L. Mendelsohn, Lawrence Livermore Laboratory, Biomedical and Environmental Sciences Divisions, University of California, P.O. Box 5507, LIVERMORE, CA 94550 (U.S.A.)

Dr. E. Moustacchi, Institut Curie, Section de Biologie, Laboratoires 110-111-112, Centre Universitaire, 91405 ORSAY-Cedex (France)

Professor Gregorio Olivieri, Istituto di Genetica, Facolta di Scienze, Città Universitaria, 00185 ROMA (Italy)

Professor Robert B. Painter, University of California, School of Medicine, Laboratory of Radiobiology, SAN FRANCISCO, CA 94143 (U.S.A.)

Dr. J.M. Parry, Department of Genetics, University College of Swansea, Singleton Park, SWANSEA SA2 8PP (England)

Dr. Herbert S. Rosenkranz, Professor and Director, Center for the Environmental Health Sciences, School of Medicine, Case Western Reserve University, CLEVELAND, OH 44106 (U.S.A.)

Dr. J. Schöneich, Zentral Institut für Kultur-Pflanzenforschung der Deutschen Akademie der Wissenschaften, Correnstrasse 3, 4325 GATERSLEBEN (Kreis Aschersleben) (D.D.R.)

Professor F.H. Sobels, Chairman, Mutation Research, Department of Radiation Genetics and Chemical Mutagenesis, State University of Leiden, Sylvius Laboratories, Wassenaarseweg 72, 2333 AL LEIDEN (The Netherlands)

Professor Takashi Sugimura, Director, National Cancer Center Research Institute, Tsukiji 5-chome, Chuo-ku, TOKYO 104 (Japan)

Dr. J. Veleminský, Czechoslovak Academy of Sciences, Institute of Experimental Botany, Department of Genetics, Flemingovo Nam 2, PRAHA 6 (Czechoslovakia)

Dr. Gösta Zetterberg, Department of Genetics and Plant Breeding, Swedish University of Agricultural Sciences, P.O. Box 7003, 750 07 UPPSALA (Sweden)
